Program Name: Bachelor of Technology

(Computer Science and Engineering)

Under the Guidance of

Mr. Anurag

School of Computer Science & Engineering

Lovely Professional University

TECHNOLOGIES USED BY US:

1. HTML

HTML stands for **HyperText Markup Language**. It is a standard markup language for web page creation. It allows the creation and structure of sections, paragraphs, and links using HTML elements (the building blocks of a web page) such as tags and attributes.

2. CSS

Cascading **S**tyle **S**heets, fondly referred to as CSS, is a simple design language intended to simplify the process of making web pages presentable.CSS handles the look and feel part of a web page. Using CSS, you can control the color of the text, the style of fonts, the spacing between paragraphs, how columns are sized and laid out, what background images or colors are used, layout designs,variations in display for different devices and screen sizes as well as a variety of other effects.
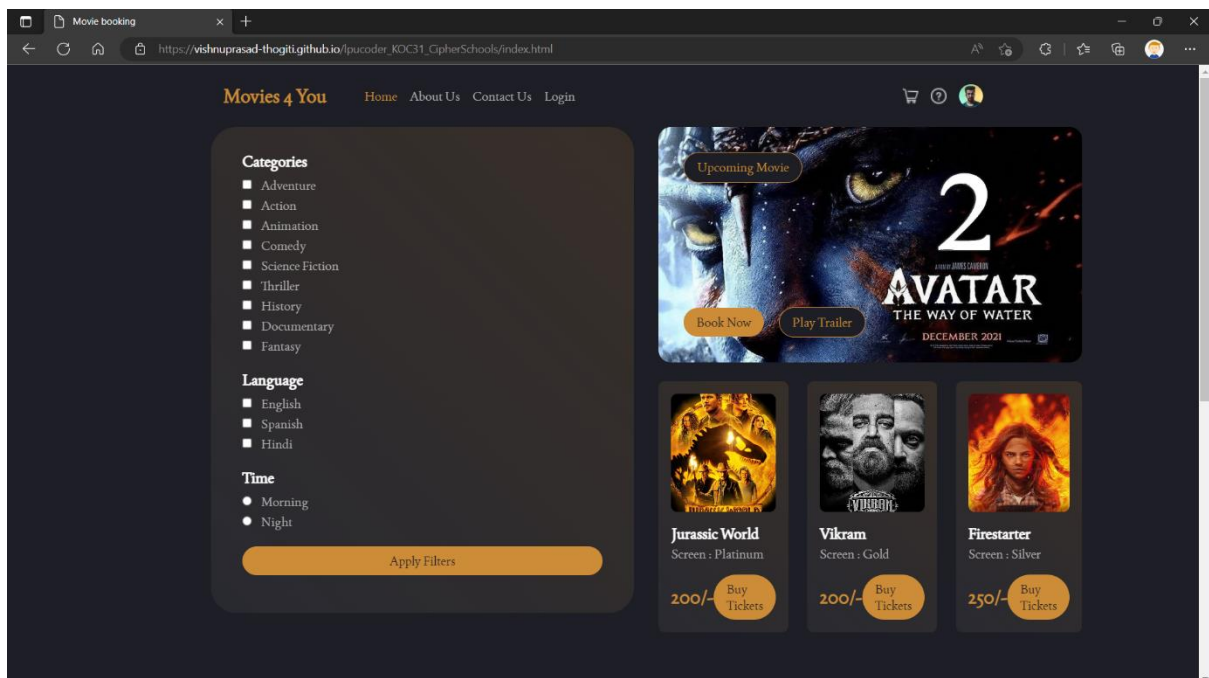

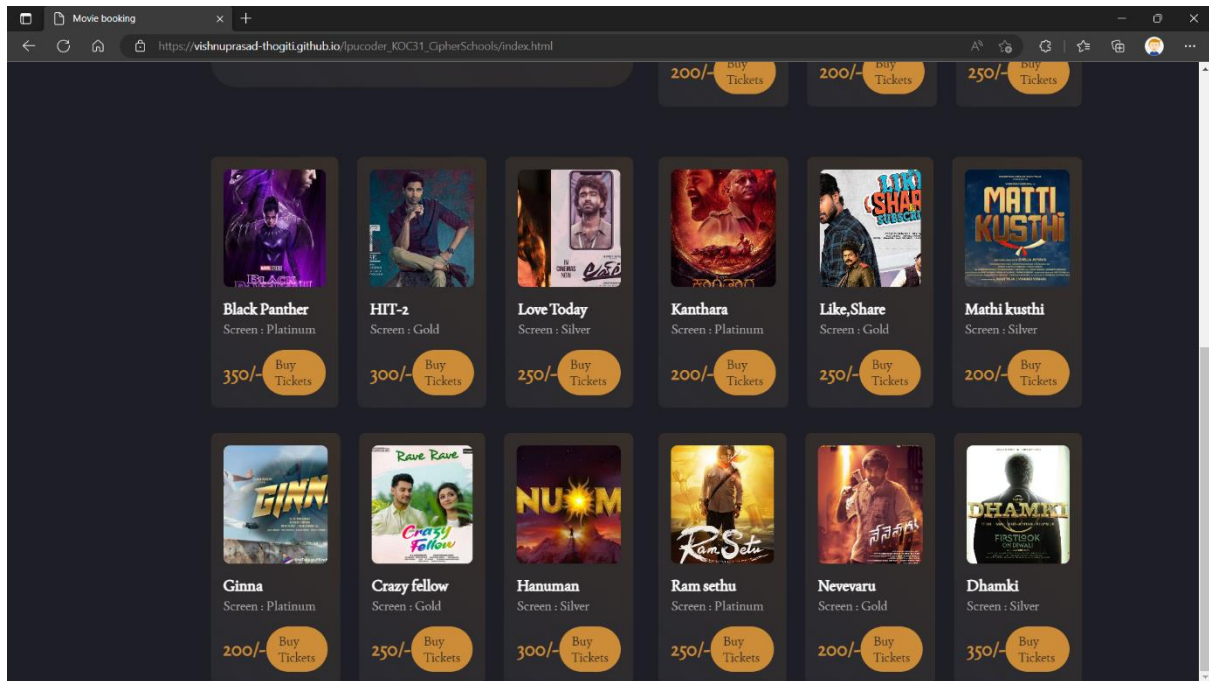

3. Java Script

JavaScript is a dynamic computer programming language. It is lightweight and most commonly used as a part of web pages, whose implementations allow client-side script to interact with the user and make dynamic pages. It is an interpreted programming language with object-oriented capabilities.

ABOUT

BOOKING MANAGEMENT SYSTEM

Primarily I would like to thank God for being able to learn a new technology. Then I would like to express my special thanks of gratitude to the teacher who provide me the golden opportunity to learn a new technology from home.

I would like to also thank my own college Lovely Professional University for offering such a course which not only improve my programming skill but also taught me other new technology.

Then, I would like to thank my parents and friends who have helped me with their valuable suggestions and guidance for choosing this course.

I am making this project not only for marks but also to increase my knowledge.

THANKS AGAIN TO ALL

CONCLUSION:

We here by conclude that, we completed our project successfully under our **Anurag sir** Our website

Movie 4 you is a world class Movie ticket booking website. Booking management is both an series, and is something that is usually quite hard to do. It is hard because one has to look at a broad range of variables, and try and guess what effect each variable will have on a Booking management project system.

We are glad that we got a opportunity to creat this website.
